# Large data dispersive solutions to the Einstein-scalar field system

Jonathan Luk<sup>\*1</sup>

<sup>1</sup>Cambridge University – United Kingdom

## Abstract

I will present recent work on the existence, stability and long time dynamics of large data dispersive solutions to the Einstein-scalar field system. This class of solutions, while having large initial data, are causally geodesically complete. This talk is based on joint works with Sung-Jin Oh and Shiwu Yang.
